BRIGHTENED

Bright and matt oxidation colours suitable for outdoor use

Brightening treatments offer metals a shiny appearance, achieving extremely pleasing effects when combined with preliminary mechanical processes. Chemical brightening is a versatile treatment perfect for accessories and profiles.

Tecno Alluminio srl : surface finishes for aluminium and metals since 1974

Since 1974, Tecno Alluminio has proposed attractive and practical surface finishes such as anodizing, brightening and powder coating, on products in aluminium and its alloys. The company proposes its mechanical and chemical metal surface finishes in a variety of sectors, for example bathroom fittings, home furniture (living, kitchen, one brand furniture), lighting engineering, automotive (auto, motorcycle, movement), railway, building, mechanical machine shops, mechanics, leather goods, medical / hospital, orthopaedic, sports equipment, recreation / sports, optical, industrial and all applications requiring embellishment and protection against corrosion and the wear and tear of accessories or profiles in aluminium and its alloys.

Brightened: surface finishes for aluminium and metals.
Bright and matt oxidation colours suitable for outdoor use: stainless steel, black, gold, blu, red, light blu, titanium, electro, silver, copper.

The colours shown here are indicative.
For exact colours, a sample should be requested.
